

Call for Abstracts 2021 IECA Northeast Conference & Expo

The 2021 Northeast Conference will feature a community of erosion and sediment control and environmental compliance professionals from various industry sectors that will gather to explore advancements in the industry and collaboratively discuss how to put technology, science, and solutions into practice. This year's conference will focus on relevant Wetland and shoreline restoration, stormwater management, climate change impact on BMPs and other issues relevant to the Northeast region and area projects. We are currently seeking abstracts for research findings, case studies, workshops, technical papers and more to help attendees learn about real world industry solutions applicable to the area. Possible presentation tracks/topics may include:

Erosion and Sediment Control

Managing Soil for Vegetative Establishment | Climate Change Impact on BMP | Innovative BMP's/Research and Development | Silt Fence, Design and Installation Innovations- Effective BMP Inspections Methods | Cold Weather Stabilization | Coastal Erosion BMP's | Jobsite Perimeter Sediment Control

Stormwater Management

Treating Whole Flow vs. First Flush in Compliance with Clean Water Act | Stream Monitoring TMDL Alternative Plans- BMP Long Term Operation and Maintenance Strategies | Stormwater BMP Remediation/Retrofit Applications | The Future of Stormwater Conveyance | Watershed Stewards Program

Wetland, Streambank & Shoreline Restoration

Working Waterways | Hydromodification Modeling, Control, and Mitigation | Streambank Stabilization- Constructed Wetlands for Stormwater Treatment | Revegetation Options and Management | Selecting the right Seed Mixes for Wetlands | Sea Level Rise impacts on Coastal Wetlands

MS4 Management (US Conferences Only)

MS4 Program Adaptive Management/Goals | Industrial Stormwater Management | Training & Enforcement- Enforcement of GI Practices Long Term | Stormwater Monitoring: Illicit Discharge, Detection and Elimination

Industry Trends

Response to Extreme Weather- Government Standards and Compliance | Flood Control | Sea Level Rise
